How Does This Work?

You'll ship your inventory to our **climate-controlled warehouse** in Florida, where we store and manage everything for you. We integrate directly with your store—whether you're on **Shopify, Amazon, WooCommerce**, or another platform—so your orders and inventory automatically sync with our system.

As orders come in, we **pick, pack, and ship** them on time, just the way you want. Tracking info is updated automatically, and your customers stay in the loop.

We'll also monitor your inventory, send low stock alerts, and support you every step of the way. Our goal is to give you a hands-off, stress-free fulfillment experience so you can focus on scaling your business.

Storage Pricing

The pricing shown reflects our starting rates for storage and can be adjusted based on the size and weight of your products. We're happy to tailor a plan that fits your specific inventory needs.

Each SKU is assigned a dedicated location in our warehouse and stored in a bin, on a shelf, or directly on a pallet—depending on the product size and type. Bins come in various sizes to fit different items, while pallets are used for larger products or backstock. We keep just enough inventory in bins or on shelves to fulfill about 1–2 weeks' worth of orders, with the rest stored on pallets as reserve stock and our bins or shelves are restocked internally when needed.
